

Because spaghetti is for eating...

Medium Cable Porters and Labels

Cable Porters keep the two ends of microphone and instrument cables separated when wrapped, preventing them from passing through the loops. The result is a tangle-free cable, ready to use. Once wrapped, there is no need to secure the cable, because it's already secured in the Cable Porter. And all are made in the USA.

A tangle-free cable no matter who wraps it, or how its wrapped!

How Retailers Benefit – Minimum 100% Gross Margin

- An individual product for counter impulse buys.
